

Training

Overview

The network of support for OU Campus includes a variety of opportunities for multimedia training. These include Training Tuesdays webinars (both live and recorded), short video tutorials, on-site training, the support site, PDFs, and the annual conference and workshops.

Training Tuesdays

OmniUpdate, Inc., provides free monthly training classes on OU Campus topics of interest. The classes are held the last Tuesday of every month and open to all OmniUpdate customers (administrators and users). The 30- to 45-minute sessions cover both new and existing OU Campus features and close with a Q&A session.

Please see the [Training Tuesdays](#) page for more information.

OU Campus Learning Management System (LMS)

The OU Campus LMS is maintained by the OmniUpdate Training Department and offers training courses and materials related to the use and administration of OU Campus. The courses are self-paced, and include videos, quizzes, and related technical and reference material. The LMS is a resource that is available to all administrators and users for the institution. To begin using the LMS, email training@omniupdate.com or speak with an administrator at your institution to get the enrollment link.

Members can login at <https://lms.omniupdate.com>.

PDF Guides

Various end-user and reference guides are available in PDF format, including the OU Campus End-User Reference Guide and the OU Campus Administrator Reference Guide.

Please see [PDF Guides](#) for a complete list.

Videos

Also available are a number of short video tutorials. The length of the videos ranges from about two to eight minutes and each is designed to provide detailed guidance about one aspect of using the OU Campus interface, such as the image editor, publishing a page, or cleaning up messy code. They are also available for download in MP4 format.

Please see [Video Tutorials](#) for a complete list.
