

Monthly Orientation Training

We are pleased to present our free Monthly Orientation trainings to all customers. These sessions provide an overview of how to use OU Campus and are open for anyone to attend, whether you are a new user who needs an introduction to the CMS or a returning user who could just use a refresher. The training lasts about two hours.

Monthly Orientation Training will take place in an OU Campus sandbox and will walk through the basic OU Campus interface. If your college or university already has an instance of OU Campus you will be able to follow along in your school's implementation as the platform functionality will be the same.

If you are a new customer and your implementation has not yet been completed, please email support@omniupdate.com to request a sandbox environment.

The next monthly orientation training will be held on: **Friday, December 12th, at 10:00 AM PT.** [Register for training.](#)

Want to check out some Orientation material before the next scheduled session? Take a look at our previously recorded [Monthly Orientation video!](#)
