

Accessibility Section

Overview

The Accessibility section contains the Known Problems Report and the Likely Problems Report, which show the known and likely accessibility issues across the entire site, measured by the accessibility standard that is defined from [Account Settings](#) in the Setup menu.

Known Problems

Known problems are issues with the page HTML that are verified to be currently causing an accessibility issue. Each known problem will be listed in its own box and will show the specific **Problem**, the **Repair** for that issue, and the list of offending pages. The list of pages contains links that allow users to travel to that page and edit it, and to travel to that page's Page Report within Insights.

Clicking the **Problem** will bring up an external link that gives more detailed information about the issue.

Known Problems Report (2 Problems) [Share Report](#)

This report contains pages with known accessibility problems. Fixing the problems can help avoid legal ramifications, improve the user experience, and keep visitors on your site.

Problem

[Image used as anchor is missing valid Alt text.](#)

Repair

Add Alt text that identifies the purpose or function of the image.

Page	Count	Options
http://gallenauniversity.com/index.html	10	Edit Page Page Report

Problem

[Anchor contains no text.](#)

Repair

Add text to the `a` element or the `title` attribute of the `a` element or, if an image is used within the anchor, add Alt text to the image.
