

## Spelling Section

### Overview

The Spelling section contains the Misspelled Words Report, which lists all the misspelled words found across the site. The list view of this report has three columns, all of which are sortable: **Word**, **Count**, and **Options**.

Each word that is considered misspelled is displayed in an expandable section. When expanded, the section lists how many pages contain that word, as well as options to edit that page and view its page report.

### Misspelled Words

#### Misspelled Words Report (843 Words)

 [Share Report](#)

This report contains all misspelled words in the site. Correcting spelling errors can improve a visitor's impression of your site and your institution.
